INCLUDED
Data Egress

Resilience is a choice.
Ransomware is not.

vGRID SecureStore is simple and secure S3 object storage that seamlessly integrates with backup software such as Veeam Backup & Replication for immutable and ransomware-proof backups. Best of all the storage is located right here in New Zealand, hosted out of some of the best Datacentres available. Using Scality ARTESCA software and HPE Alletra storage hardware the vGRID SecureStore service provides cloud based storage that scales to your requirements. vGRID SecureStore buckets can be accessed securely from almost anywhere over the Internet using strong TLS encryption.

For Veeam Backup & Replication v12

By using Scality ARTESCA software vGRID SecureStore is certied Veeam Ready and supports Direct-to-object backups, VM Instant Recovery, Smart Object Storage API (SOSAPI), Multi-bucket scale-out backup repositories (SOBR) and is validated for both performance tier and capacity tier. All this is available with Veeam Ready immutability using Object Lock in either compliance or governance mode to secure your data.

vGRID SecureStore provides an exceptional level of data durability with dual-level distributed erasure coding to ensure that node failure and disk failure in the storage cluster does not impact on data availability and integrity. Along with security and reliability vGRID SecureStore performs exceptionally well. Access can be over the Internet or via cost-effective dedicated connections with all data stored in New Zealand on multi-node clusters with high performance hybrid flash storage.

For Veeam Backup for Microsoft 365

vGRID SecureStore provides a great place to store your Veeam Backup for Microsoft 365 backup data. It integrates natively with the Veeam product and can be used as a secondary backup copy if you already have your backup data somewhere else. vGRID SecureStore scales as your Microsoft 365 data grows, providing as much storage as you need to securely protect your important business data from loss. The vGRID SecureStore object storage solution is more ecient than simple block-based storage allowing you to store data in less space, up to 50% less.

Most comprehensive and seamless Veeam integration

Assured backup integrity for worry-free restores

High performance for critical backup and restore operations

50% more efficient storage for Microsoft 365 backups

Extreme value with ultra-low total cost of ownership
