

Performance. Reliability. Control.

Experience the power and reliability of enterprise-level cloud services with vGRID. We offer on-demand server infrastructure and essential services, including off-site backups, disaster recovery, cloud-based object storage, high-performance networking, voice services and more, all previously accessible only to large corporations.

What is vGRID®

vGRID offers industry-leading performance and flexibility tailored to your business needs, along with the benefits of high-availability self-service enterprise infrastructure.

In today's modern economy, reliable infrastructure is crucial for business success. We believe that choosing the right partners is vital to delivering on promises. At vGRID, we collaborate with industry leaders to ensure top-notch service:

- VMware Cloud Director: The world's leading multi-tenant hypervisor
- Veeam: The industry leader in data protection services
- HPE Alletra: World leader in high-performance, zero-downtime storage
- HPE Synergy: The most trusted and reliable always-on compute platform

We are focused on delivering value to the reseller channel, partner with vGRID today and give your business the advantage of enterprise-level server, storage, backup and disaster recovery services from a New Zealand owned and operated business.
